Diligent Data Analyst with 4 years of experience(2+ in python and 2 in SAS). Seeking an opportunity to use my diverse skills in data analysis into the open data analyst position at your company. Jovian.ml certified data analyst.

WORK EXPERIENCE(4 YEARS)

Data Analyst

LTI

10/2018 - Present

Project- TIS(Client- Travelers Insurance Company U.S.A)

- Develop SAS and Python reports that pulls business data from data warehouse, apply business logic and provide final output to business. We use teradata, Excel, SQL etc as input source and produce output in HTML, Excel, Text files.
- Maintaining and Supporting 50+ SAS and python report.
- Develop python server maintenance script to generate an excel report that will find unused files and folders present in the storage server. The report will be used by the client to identify potential free space opportunities.

Contact: Santosh Joshi(Team Mate) - 9052084397

Data Analyst

LTI

04/2017 - 04/2018

Project -Structural Settlement(Client- Travelers Insurance Company U.S.A)

- Developed an automated SAS process which imports data from excel files present at different locations. After the files have been imported to SAS datasets then user defined SAS macros can be run for those datasets to clean or transform the data. Finally all the datasets are combined and business logic is applied to produce final output file which is shared with client.

EDUCATION

Kendriya Vidyalaya

Deolali, Nashik

Computer Engineering

D.Y Patil College, Pune University

05/2012 - 05/2016

First Class With Distinction

SKILLS

Python

SAS

Macros

Teradata

SQL

Seaborn

Pandas

OTHER PROJECTS

Codethemall (06/2020 - Present)

- Youtube channel and personal blog where I share my ideas.
- I create programming tutorial on the youtube channel. https://www.youtube.com/channel/UCJr3_kkkSMFawbFYW6KBCZA
- This blog is developed and maintained by me. Build with Django and React. <https://github.com/harishbisht29/blog>

Virtual Hand (07/2019 - Present)

- A python tool to automate mouse and keyboard movements.
- <https://github.com/harishbisht29/VirtualHand>

BoxOfficeSearch (08/2019 - Present)

- Simple box office search web application where users can search any movies
- <https://box-office-search.herokuapp.com/>

ACHIEVEMENTS

Created a python process to analyse 500+ SAS reports, saving 1000+ hours of efforts.

Automated the process of finding unused files present on storage server that account for 500+ GB.

Jovian certified data analyst.
